SKILLS

- Technical specifications
- Resolve technical issues
- Learning Initiatives
- Cyber Security
- Cybersecurity
- MongoDB
- Agile
- Azure
- Gcp
- Collaboration skills
- Entrepreneurial
- Ethical
- Quick Learning
- RESTful API integration
- Node.js experience
- Microservices architecture
- NoSQL databases
- Continuous deployment
- Teamwork and collaboration
- Problem-solving
- Attention to detail
- Time management
- Organizational skills

PROFESSIONAL SUMMARY

Experienced Full Stack Engineer skilled in developing scalable applications and optimizing system performance with a strong focus on collaboration and mentorship. Proficient in Node.js, microservices architecture, and RESTful API integration, ready to drive innovative solutions. Seeking to leverage technical expertise and problem-solving skills in a dynamic Full Stack Engineer role.

EXPERIENCE

February 2025 - May 2025

Full Stack Engineer

Kijo, Birmingham

- Collaborated extensively within a creative WordPress-focused design agency, delivering cutting-edge digital solutions tailored to diverse client needs.
- Took ownership of technology selection, aligning each project's unique requirements with the most effective and innovative tools available, while consistently prioritising client satisfaction and project success.
- Built interactive, visually compelling websites using advanced technologies including React, Node.js, PHP, and Docker, ensuring seamless user engagement and responsive performance.
- Developed and optimised Node.js backend microservices integrated with PostgreSQL databases, enhancing data-driven application functionality and reliability.
- Partnered closely with creative and technical teams to transform complex design concepts into practical, aesthetically pleasing, and intuitive websites.
- Actively mentored and guided junior developers, promoting best practices, knowledge exchange, and continuous professional growth within the team.

July 2023 - August 2024

Full Stack Engineer

Quinyx, London

- Designed and delivered scalable full-stack solutions, focusing on performance optimization and seamless user experiences.
- Developed robust frontend features using React and TypeScript, ensuring responsive and accessible designs.
- Designed backend microservices with Node.js, integrating PostgreSQL databases for high-efficiency data handling.
- Collaborated with product managers and designers to translate UI/UX designs into functional, user-friendly applications.

- Enhanced CI/CD pipelines, reducing deployment times by 30% and ensuring high code quality through automated testing.
- Mentored junior engineers, fostering a culture of knowledge sharing and continuous improvement.

October 2022 - July 2023

Full Stack Developer

Viooh, London

- Focused on developing scalable and maintainable applications while integrating third-party APIs and optimizing system performance.
- Built modular frontend components with React, Vue.js, and TypeScript, improving code reuse and maintainability.
- Developed backend features using Python and Node.js, ensuring seamless API integration and secure data exchange.
- Optimized application performance, reducing load times by 25% and enhancing overall user satisfaction.
- Maintained robust testing practices, including unit and integration testing, ensuring software reliability.

June 2021 - September 2022

Software Engineer

Squiz, London

- Delivered high-quality applications by contributing to both greenfield and legacy projects, focusing on frontend and backend development.
- Developed dynamic, responsive web interfaces using Angular and React, enhancing user engagement and usability.
- Refactored legacy systems to modern frameworks, reducing technical debt and improving maintainability.
- Designed backend services with Python and integrated them with PostgreSQL for efficient data management.
- Collaborated with the infrastructure team to deploy applications securely and scalably on AWS.

August 2018 - December 2021

Full Stack Developer

ITech Media, London

- Built and maintained full-stack solutions, contributing to the entire software development lifecycle.
- Developed backend logic using Ruby on Rails, ensuring scalability and security in handling sensitive data.
- Built intuitive user interfaces with React, aligning designs with user-centric principles.
- Integrated MySQL databases, optimizing queries to handle high-traffic scenarios efficiently.
- Wrote detailed technical documentation and provided mentorship to junior developers.

August 2017 - August 2018

Junior Full Stack Developer

EG Worldwide, London

- Gained foundational experience in full-stack development, contributing to responsive and interactive applications.
- Built frontend components with JavaScript and Vue.js, ensuring cross-browser compatibility and responsiveness.
- Assisted in developing backend features with Node.js, integrating third-party APIs for extended functionality.
- Debugged and resolved issues in existing systems, improving reliability and performance.
